

## SALMON OIL: NUTRITIONAL SUPPLEMENT FOR CATS AND DOGS

- Healthy skin, shiny coat
- Rich flavour adapted to the taste of cats and dogs
- Boosts the immune system
- Improves the muscle tonus
- For a strong heart and a longer life

### Healthy skin, shiny coat :

The salmon oil provides Omega-3 fatty acids from the type EPA (Eicosapentaenoic Acid) en DHA (Docosahexaenoic Acid). These have a much higher biological availability than Omega-3 fatty acids from vegetable sources. EPA en DHA are important nutrients that your pet needs for a healthy skin and a shiny coat. EPA en DHA also contributes to the maintenance of the joints.

### A strong heart and a good health :

Salmon oil, just a simple and normal way to help your pet stay healthy. It contains Omega-3 and Omega-6 fatty acids, which helps to preserve the immunity system, a good health and a general vitality.

### Instructions for use :

Add daily a dose of salmon oil to the food of your cat or dog, according to the weight table underneath. To optimise the result, it's recommended to use the product regularly and for a long period of time.
